SUMMARY

Aspiring Data Scientist and AI engineer with hands-on experience in developing AI-driven applications and data-focused solutions. Skilled in Data Analysis, Data Visualization, and Power BI dashboard Development. Passionate about transforming data into meaningful insights and building innovative, real-world technology solutions.

SKILLS

- Data science
- Data visualization
- Agentic web development
- Power BI
- MS Excel
- C Java and python programming

EDUCATION AND TRAINING

B.Tech: Information Technology
Sethu Institute of Technology - Kariapatti

LANGUAGES

English: B1
Intermediate (B1)

AWARDS & HONORS

Best student of the academic year 2024-2025
First place in Innogen Hackathon conducted by Tarcin robotics madurai
First place in synchrocode coding competition in Hexaivita"25 at sethu institute of technology (National level Symposium)
Second place in codesprint pro coding event in mangayarkarasi college
Won a best project award in the science expo at sethu institute of technology

CERTIFICATIONS & LICENSES

c , java and python programming
project based robotic training(lot level)
EF SET English 4 Skills Test and achieved a C1 Advanced level score of 62/100.

MINI PROJECTS

- **GENQUIZ:** Developed a full-stack AI-powered multiplayer quiz and gaming platform using React, FastAPI, Supabase, and WebSocket integration. Built features including AI quiz generation, real-time multiplayer rooms, manual quiz creation, voice interaction, and interactive mini-games with responsive UI/UX and smooth animations.
- **RAG-based Chatbot:** Developed a context-aware chatbot using RAG architecture with AI integrations.
- **Tourism Recommendation App:** Built a full-stack tourism web app using Fluttter with API integrations to provide personalized travel recommendations.
- **Global Ontology Engine:** Designed an ontology-driven system in React, Flask and supabase integrated with Gemini/OpenRouter APIs for structured knowledge retrieval and intelligent querying.
